

# Z8821P

Ideal for those wanting a truly high performance, extremely quiet, easy to manoeuvre vacuum with outstanding dust, dirt and pet hair pick up on all surfaces.

Z8821P

## PRODUCT BENEFITS

### UltraOne – Turns vacuuming into a joy!

For some reason you normally do not connect vacuuming with words such as “pleasure” or “joy”. Until now. The new UltraOne is

incredibly effective, extremely quiet and ergonomically advanced. But what really makes this vacuum cleaner different from others is the feeling of superior handling and precise manoeuvring. All this to make vacuuming more of a pleasure - maybe even something you will look forward to.

### Top European tested cleaning performance\*

UltraOne delivers outstanding cleaning performance. So much so it achieved top scores in independent cleaning performance

tests. (Independent tests made by laboratory SLG Pruf- und Zertifizierungs GmbH, Nov 2008). The unique combination of sealed and optimised airflow, innovative AeroPro nozzle system and a powerful 2200 watt motor allows UltraOne to take vacuuming to a whole new level. \*Independently tested against four comparable competitors – Europe, October 2008.

## SOMETHING TO CONSIDER

### Z8871P

Ideal for those wanting a truly high performance, extremely quiet, easy to manoeuvre vacuum with outstanding dust, dirt and pet hair pick up, and deep down carpet grooming performance.

## TECHNICAL DATA

model:	Ultra One
model #:	Z8821P
max power:	2200w
Filter:	HEPA H13
cleaning reach:	12m
bagged/bagless:	Bagged
Colour:	Ice white
recommended retail price:	\$649

### **Extremely quiet**

Utilising sophisticated Silent Air Technology the UltraOne rates a low 72 decibels. All the way from the nozzle to the exhaust the airflow is optimised to maximise performance and minimise noise. Plus the smooth airtight internal design, double insulated shell and soft motor mountings mean minimal vibration and air resistance – which all contribute to its extremely quiet operation.

### **Exceptional handling**

To help you vacuum with simplicity and precision the AeroPro nozzle system has soft wheels and double joints. The large, soft and quiet rear wheels are designed to roll with minimal resistance, meaning much less effort to keep the vacuum right behind you. The parking locations on the side and back make it possible to park the nozzle and hose in an upright position for easy storage and transport.

## **PRODUCT FEATURES**

**Sealed HEPA 13 washable exhaust filter**

**Extremely quiet - 72 decibels**

**ergonomic carry handle and bumper**

**Brushed aluminium tube**

**3-in-1 accessory nozzle**

**soft bumper and wheels**

**hard floor nozzle included**

**AeroPro combination floor nozzle**
