

VR5000 Point Clean

SAMSUNG

SR10J5050UD

Airborne Blue

Features

- Navigation System: Visionary Mapping™
- Ni-MH Battery
- Recharging Time – 120 mins (approximately)
- Running Time – 90 mins (approximately)
- Five cleaning modes: Auto/Spot/Max/Manual/Edge
- Point Cleaning™
- Silent Mode
- Auto Docking
- Noise Levels 70dBa
- Remote Control
- 3 x Cliff Sensors
- 10 x Obstacle Sensors
- 1 x Virtual Guard
- Extra Cleaning Tool
- Extra Filter

Product Packaging

General Information

Available Time	August 2015
RRP	\$849
SAP Code	VR10J5050UD/SA
EAN Code	8806086989640
Country of Manufacturer	Vietnam

Dimensions

Net Weight	3.6kg
Package Weight	6.2kg
Net Width	355mm
Net Height	93mm
Net Depth	355mm
Gross Width	423mm
Gross Height	160mm
Gross Depth	511mm

VR5000 Point Clean

SAMSUNG

Visionary Mapping™

The VR5000's Visionary Mapping™ technology is amazing revolutionary. VR5000 Point Clean utilizes a digital camera in its mapping system. The benefit of including a camera vs no camera is so dramatic that it's like comparing sweeping the floors with eyes open versus blindfolded! The maps are created to be smart and efficient, to help find the direct path.

Auto Docking

When the battery is low, VR5000 Point Clean automatically takes the shortest route back to the docking station for recharging. When it is fully recharged, it then goes back to its last location and resumes cleaning. So your floors are always clean, because the VR5000 can always be ready!

Point Cleaning™

VR5000 includes Point Cleaning™ that lets you guide it to clean dusty spots. So you don't have to stop the vacuum, pick it up and move it to clean a specific area.

Quiet Operation

VR5000 Point Clean includes a mode called Silent Mode that helps reduce operating noise while still offering great cleaning performance. It's so quiet at around 62dBa that it is possible to watch TV or have a conversation whilst the VR5000 Point Clean does its job.
