# Sunbeam's Safety Precautions

## SAFETY PRECAUTIONS FOR YOUR SUNBEAM DUOS SOUS VIDE AND SLOW COOKER

- Do not plug in or switch on the unit without having the cooking pan inside the unit.
- Do not operate the unit on an inclined surface
- Do not move or cover the unit whilst in operation
- Do not immerse the base of the unit in water or any other liquid
- Use your unit well away from walls and curtains, and don't use in confined spaces.
- Do not touch any metal surfaces of the unit while it is in use as they will be hot.
- Use handles and oven mitts to move the unit, the cooking pan and the lid when hot.
- Do not operate the unit without food or liquid in the cooking pan.
- Be careful when lifting and removing lid after cooking. Always tilt the lid away from you as steam is hot and can result in serious burns. Never place face over the unit.
- Unplug the unit when not in use and before cleaning. Allow the unit to cool before putting on or taking off parts to clean.
- Do not use the pan on the stovetop, inside a microwave oven or inside an oven
- Do not use the cooking pan for food storage or place in the freezer.
- Do not operate the unit when placed directly onto a bench top. Place a heat proof mat or chopping board underneath to protect the surface.

# Sunbeam's Safety Precautions

**Sunbeam is very safety conscious when designing and manufacturing consumer products, but it is essential that the product user also exercise care when using an electrical appliance. Listed below are precautions which are essential for the safe use of an electrical appliance:**

- Read carefully and save all the instructions provided with an appliance.
- Always turn the power off at the power outlet before you insert or remove a plug. Remove by grasping the plug - do not pull on the cord.
- Turn the power off and remove the plug when the appliance is not in use and before cleaning.
- Do not use your appliance with an extension cord unless this cord has been checked and tested by a qualified technician or service person.
- Always use your appliance from a power outlet of the voltage (A.C. only) marked on the appliance.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- The temperature of accessible surfaces may be high when the appliance is operating.
- Never leave an appliance unattended while in use.
- Do not use an appliance for any purpose other than its intended use.
- Do not place an appliance on or near a hot gas flame, electric element or on a heated oven.
- Do not place on top of any other appliance.
- Do not let the power cord of an appliance hang over the edge of a table or bench top or touch any hot surface.
- Do not operate any electrical appliance with a damaged cord or after the appliance has been damaged in any manner. If damage is suspected, return the appliance to the nearest Sunbeam Appointed Service Centre for examination, repair or adjustment.
- For additional protection, Sunbeam recommend the use of a residual current device (RCD) with a tripping current not exceeding 30mA in the electrical circuit supplying power to your appliances.
- Do not immerse the appliance in water or any other liquid unless recommended.
- Appliances are not intended to be operated by means of an external timer or separate remote control system.
- This appliance is intended to be used in household and similar applications such as: staff kitchen areas in shops, offices and other working environments; farm houses; by clients in hotels, motels and other residential type environments; bed and breakfast type environments.

If you have any concerns regarding the performance and use of your appliance, please visit [www.sunbeam.com.au](http://www.sunbeam.com.au) or contact the Sunbeam Consumer Service Line.

Ensure the above safety precautions are understood.

# Features of your Sunbeam Duos™ Sous Vide and Slow Cooker

**Tempered Glass Lid**

**5.5 litre working capacity**

**Non-slip feet**

Keeps the unit secure on the bench top during use and prevents scratching of bench top surfaces.

**Non-stick Removable Cooking Pan**

The removable cooking pan is non-stick, and dishwasher safe for easy cleaning.

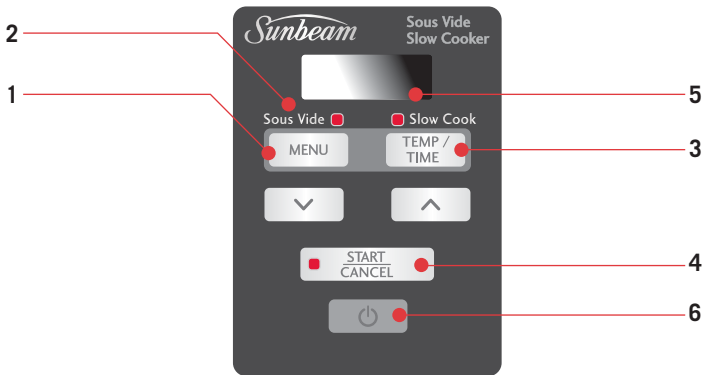

**Control Panel**

**Pouch rack**

Separates sous vide pouches for more even cooking.

# The Control Panel

The control panel on the Sunbeam Duos Sous Vide and Slow Cooker is designed to ensure easy use. Choose your cooking menu, set the temperature and time, and start cooking.

## 1. **Menu Button**

Scroll to the Sous Vide menu or the Slow Cooker menu by pressing the MENU button.

## 2. **Cooking Menu indicator**

A light will display in the screen next to Sous Vide or Slow Cook menus, when the MENU button is selected.

### **Sous Vide Menu**

The Sous Vide menu has heat settings from 40°C to 90°C.

### **Slow Cook Menu**

The Slow Cook menu has three heat settings – LOW, HIGH and AUTO KEEP WARM.

## 3. **Temp/ Time Button**

After you've selected your cooking menu, set the temperature required by pressing the **▼** and **▲** buttons. After you've selected the temperature, set the time required by pressing the TIME button, then the **▼** and **▲** buttons.

## 4. **Start/ Cancel button**

Press the START button to begin the selected cooking menu once all settings have been chosen. Press and hold the CANCEL button for three seconds if you wish to change your setting.

## 5. **Timer display screen**

Will show the remaining time in the COOKING menus, or elapsed time in the slow cook KEEP WARM mode.

## 6. **Power Button**

Press to turn your Sunbeam Duos ON or OFF. Always unplug your unit when cooking is finished.

**TIP:** After starting your menu selection, if the START button has not been pressed after 20 minutes, the unit will switch off as a safety precaution.

# Cooking Menus Overview

The Sunbeam Duos has 2 cooking menus.

## **Sous Vide Cooking**

Sous Vide has been a popular cooking method in restaurants for several years. Sous Vide is a French term which means 'under vacuum' and describes food placed in vacuum sealed pouches and cooked in a water oven. Food slowly cooks at precise low temperatures over a long period of time to achieve succulent, superb tasting meals. Sealing foods inside pouches allows it to cook in its own juices in addition to any marinades, seasonings etc you wish to add. Vitamins, minerals and juices are retained within the food and natural flavours are intensified. This allows the food to be healthier, more tender and flavoursome. Meats cooked in a sous vide tend to be more tender, tougher and mostly cheaper yet flavour filled cuts of meats such as chuck steak can be used.

As sous vide cooking requires foods and meats to be sealed individually, yet cooked at the same time; it is perfect for families and entertaining when there are people with varied tastes and nutritional requirements.

It is difficult to overcook using the Sous Vide method, although textures can change slightly. As it's difficult to overcook, it allows food to be cooked ahead of time, perfect for family meals and entertaining.

Temperatures. The Sunbeam Duos has a 40°C to 90°C temperature range, with 1°C increment selection. Different temperatures are required for different types of food and for different degrees of doneness. See the Sous Vide Temperature and Time Guide on page 12.

Time. The cooking time depends on the thickness of the food, rather than the weight of the food. The default cooking time is 1 hour. Time can be set from 1 hour to 24 hours. See the Sous Vide Temperature and Time Guide on page 12 for more information.

Ideal Foods for Sous Vide Cooking. Meats are ideal to cook using the sous vide method as they are more tender, succulent and flavour filled.

Red meats - Lamb, beef and pork.

Poultry - Chicken, turkey, duck.

Fish and Seafood - Fish, lobster tails, scallops.

Vegetables - Root Vegetables. Potato, carrot, parsnip, beets, turnips.

Vegetables - Tender Vegetables. Peas, asparagus, corn, broccoli, cauliflower, eggplant, onions, squash.

Fruit - Firm Fruits. Apple, pear.

Fruit - Tender Fruits. Mango, plum, apricot, peach, nectarine, papaya, strawberry.

## **Steps to Sous Vide cooking**

### Step 1. Seasoning your food

To enhance the flavour of your food, you may wish to marinade or add spices, herbs, butter or oil to your vacuum pouch prior to sealing.

### Step 2. Vacuum sealing your food

Sous vide cooking requires food to be vacuum sealed inside pouches to ensure excess air and moisture are removed, so the natural taste and nutritional quality

of the food is captured. Vacuum sealing also assists in opening the pores in food such as meat, poultry and seafood so that marinades and seasonings are more readily absorbed for highlighted flavour.

Oxygen and moisture in air cause food to degrade and lose flavour, texture and nutritional value. Commercial quality vacuum systems remove air and moisture before sealing items airtight to create a commercial quality vacuum. We recommend Sunbeam FoodSaver vacuum sealers and FoodSaver bags and rolls.

### Step 3. Cooking your food

When the water temperature has been reached in the sous vide, place the pouches carefully in the water. Ensure the pouches are fully submerged in water, and that water can easily circulate around the pouches for even cooking.

### Step 4. Searing your food

When sous vide cooking is completed, you may wish to finish off by searing to improve the appearance and flavour of the food. This is particularly suited to meats. Remove the food from the pouch. Quickly sear meat in a hot pan. This will caramelise the fats and proteins for extra flavour.

### **Food Safety Guidelines for Sous Vide Cooking**

**CAUTION. Food cooked using the Sous Vide method of cooking is not recommended for consumption by those in an 'at risk' category (low immune deficiency);**

- Pregnant women
- Small children
- Elderly
- Those suffering from illness/disease

**The below guidelines regarding using the Sous Vide method will help to ensure good food hygiene safety.**

### Food Preparation

- All food items to be used for cooking using the Sous Vide method should be of the highest quality in freshness.
- Ensure that all meat, seafood, poultry and game have been stored at below 5°C before preparation begins. Using a digital food thermometer to check the temperature is recommended.
- Make sure that the food pouches are clean and have not been contaminated by dirt or other food contaminants.
- Use detergent and warm water, or a sanitizing solution to wash the food preparation area.
- Separate the raw ingredient preparation area from the finished product area
- Wash hands well before commencing any food preparation.
- Prepare foods to the recommended thickness according to the Sous Vide Temperature and Time Guide on page 12. Smaller cuts of meat will cook more quickly.

# Cooking Menus Overview continued

## Cooking

- Use the Sous Vide Temperature and Time Guide for cooking times and temperatures.
- Ensure that the cooking pouch is completely sealed before cooking commences.
- Ensure that the cooking pouch is still completely sealed when cooking has finished.

## Storage

- If the food is not going to be consumed immediately, plunge the pouch containing the food into iced water to reduce temperature quickly. Refrigerate until required.

## Reheating

- Reheat food until internal temperature is above 75°C.

## **Slow Cooking**

Slow Cooking achieves flavour filled meals, and tender moist meats cooked to perfection. Slow Cooking provides healthy, simple and economical cooking. It requires minimal supervision, short preparation times and quick clean up times.

LOW Setting. This is suitable for simmering and slow cooking.

HIGH Setting. This is for faster cooking. Typically 1 hour on HIGH = approximately 2 - 2.5 hours on LOW.

KEEP WARM Setting. When slow cooking time is completed, the Sunbeam Duos automatically switches to the Keep Warm setting to prevent overcooking and to keep your cooked food warm until serving - perfect for busy families, those on the run and those who need flexible meal times. This setting is not hot enough to cook, and should only be used to keep hot, cooked food warm for serving.

# Cooking Menu Settings Table

Cooking Menu	Sous Vide	Slow Cook
<b>Temperature</b>		
Settings	40°C to 90°C	High Low (Warm)
Default Cooking Temperature	50°C	Low
Temperature Increments	1°C	NA
<b>Time</b>		
Settings	1 to 24 hours	High – 2 to 8 hours Low – 4 to 16 hours
Default Cooking Time	1 hour	High – 4 hours Low – 8 hours
Time Increments	10 mins	30 mins

**Note:** On the slow cook setting, the maximum combined COOK/KEEP WARM time is 24 hours. For example if the slow cook time selected was 16 hours, the maximum keep warm time would be 8 hours.

# How to use the Sous Vide menu

Place the Sunbeam Duos on a flat, level surface.

Plug in the unit. To turn the unit on, press the POWER button. The unit will beep, and the indicator lights and the screen will illuminate. The Sunbeam Duos will default to the Sous Vide menu, on the 50°C setting.

1. Fill the cooking pan with the desired amount of water, and replace the lid. Ensure the water will cover the food pouches and is above the FILL line in the pan. View the Sous Vide Temperature and Time guide on page 12.

**TIP:** To speed up the time needed to reach the desired temperature, fill with warm water.

2. If the menu is not set to Sous Vide, set the cooking menu by scrolling through the MENU button until a light appears next to Sous Vide on the screen, and the temperature shows 50°C.
3. The default temperature is set to 50°C. To change the temperature, press the ▼ and ▲ buttons until your desired temperature appears in the screen.
4. To select the time, press the TIME button, and then press the ▼ and ▲ buttons, until your desired time appears in the LCD screen. Each button press will adjust the time by 10 minutes, or if the button is held this will change the time more quickly.
5. Once you have set the desired MENU, TEMP and TIME settings, press START. The unit will start to preheat.
6. The Sunbeam Duos needs to gain temperature before the food pouches can be placed in the sous vide pan. When the unit is gaining temperature, the red Sous Vide light will flash in the screen to indicate the set temperature has not yet been reached, and the time ■ symbol won't

flash to indicate the timer has not begun. When the selected temperature is reached, the unit will beep 3 times to indicate the set temperature has been reached, the Sous Vide light will stop flashing and the unit is ready for the food.

7. Carefully remove the lid. With a pair of tongs gently place the sealed food pouches in the water ensuring the water level does not exceed the MAX line, and that the food is covered by water. Replace the lid. (For further information regarding sealing your food, see Cooking Menus Overview on page 7.)

**TIP:** You can slot the sealed food pouches vertically in the slots of the rack to ensure the food is separated and that water can circulate evenly.

8. When the sealed food pouches are in the pan, press START so the timer can begin to countdown. The ■ symbol will start flashing to indicate the timer has started and that the unit is counting down.

**Tip:** If you do not press START to activate the timer the unit will still work as normal at the set temperature and will cook for the maximum setting of 24 hours or until you switch the power off.

9. After the set cooking time has elapsed, unit will beep 3 times and turn off.

**TIP:** During cooking, only lift the lid if necessary as sous vide uses low temperatures to cook, so the unit does not recover lost heat quickly. If condensation forms on the inside of the lid reducing your vision, carefully tilt the lid away from you so that the condensation falls back into the pan.

# Sous Vide Temperature and Time Guide

The below table is a guide to setting the temperatures and times for your cooking. You may need to adjust for your individual tastes.

**Note:** Holding time represents the longest suggested period the food can remain in the Sunbeam Duos unit before the texture starts to change.

**Note:**

- Longer cooking times may result in an altered texture of finished foods.
- These times and temperatures are guidelines. Further cooking may be required to achieve desired result.
- All thicknesses are measured once the food has been vacuum sealed.
- Thinner cuts of meat will cook more quickly.

# How to use the Slow Cook menu

Place the Sunbeam Duos on a flat, level surface.

Plug in the unit. To turn the unit on, press the POWER button. The unit will beep, and the indicator lights and the screen will illuminate. The Duos will default to the Sous Vide menu, on the 50°C setting.

1. Place your food and liquid inside the removable cooking pan, and replace the lid.
2. If the menu is not set to Slow Cook, set the cooking menu by scrolling through the MENU button until a light appears next to Slow Cook on the screen, and the temperature setting shows LO.
3. The default temperature is set to LO. To change the temperature to high, press the ▼ and ▲ button, until HI appears in the LCD screen.
4. To select the time, press the TIME button, and then press the ▼ and ▲ buttons, until your desired time appears in the screen. Each button press will adjust the time by 30 minutes, or if the button is held this will change the time more quickly.
5. Once you have set the desired MENU, TEMP and TIME settings, press START. The time will begin to countdown. The ■ symbol will start flashing to indicate the unit is counting down.
6. After the set cooking time has elapsed, unit will beep 3 times, and automatically switch to the KEEP WARM setting. The Slow Cook light will change to green to indicate it is in the KEEP WARM setting. The timer will begin to count up to show elapsed time in the KEEP WARM setting.

**Tip:** During cooking, only lift the lid if necessary as slow cook uses low temperatures to cook, so the unit does not recover lost heat quickly. If condensation forms on the inside of the lid reducing your vision, carefully tilt the lid away from you so that the condensation falls back into the pan.

# Care and Cleaning

Cleaning should only be carried out when the Sunbeam Duos is switched off and the plug removed from the socket. Allow the water to cool, and then pour out. Do not leave water sitting in the pan. Allow the unit to completely cool before cleaning.

Do not use the removable cooking pan on the stovetop, inside a microwave oven or inside an oven. Use the pan only inside the Sunbeam Duos unit.

The lid and the removable cooking pan are dishwasher safe for added convenience. Place the lid on the upper rack of your dishwasher. To remove food that is cooked onto the bottom of the removable cooking pan, soak the pan in warm water before cleaning. Dry thoroughly before replacing the pan in the unit.

Wipe the exterior of the Sunbeam Duos with a damp cloth and polish dry. **DO NOT** use harsh abrasives, scourers or chemicals to clean any part of the Sunbeam Duos as these will damage the surfaces.

Do not immerse the Sunbeam Duos unit in water or place in a dishwasher.

# Hints and Tips

With your Sunbeam Duos you can create a wide variety of meals. Various foods take different times to cook perfectly to your individual taste, so sometimes it may take a little trial and error to get the cooking times right for you.

## Capacity

- Don't overfill or under fill your Sunbeam Duos unit. Ensure the level is between the FILL (minimum) and MAX markings on the inside of the cooking pan. When using the sous vide menu, always ensure that the water covers the food pouches. When using the slow cooker, always ensure that liquid covers the food.
- To speed up the time needed for the unit to reach the desired Sous Vide temperature, fill with warm (not hot) water.

## Food

- Cuts of Meat. Sous Vide and Slow Cooking are perfect for the cheaper, tough cuts of meats, as the lengthy cooking process tenderises these cuts and enhances the flavours. Note that thinner cuts of meat will cook more quickly.
- Evenly cooked food. To ensure food cooks evenly in the same amount of time, we recommend food is cut to similar thicknesses/ sizes.

## Lid

- Condensation can accumulate on the inside of the lid, reducing your vision. Carefully tilt the lid away from you so that the condensation falls back into the pan.
- Lifting the lid. Both sous vide and slow cooker cooking methods use low temperatures and therefore they do not recover lost heat quickly. If you need to lift the lid, do so quickly to minimise heat loss.

## Food Safety Guidelines for Sous Vide Cooking

**CAUTION. Food cooked using the Sous Vide method of cooking is not recommended for consumption by those in an 'at risk' category (low immune deficiency);**

- Pregnant women
- Small children
- Elderly
- Those suffering from illness/disease

## Slow Cooking

- If you are slow cooking, you may wish to brown your meats first in a frypan. Browning meat prior to slow cooking not only gives your food great colour, it also seals in the juices and flavours and keeps the meat tender.
- Slow Cooking prevents evaporation, resulting in the flavours and juices being maintained. Keep this in mind when creating your own recipes, as you may not require as much liquid as you would when using other cooking methods.

## Hints and Tips continued

### Slow Cooked Roasts

- You can roast a whole chicken as well as whole pieces of meat, such as lamb, beef, veal and pork by using the Slow Cook menu.
  - Roasts can be cooked without the addition of liquid as they will release juices while cooking. These juices are great to make sauces and gravies.
  - Roasting in the Slow Cooker will not brown your meat or chicken, as roasting in an oven does. If you want your roast to be golden, we recommend browning the meat first for a few minutes in a frypan to sear the meat, and then slow cook.
  - Approximate cooking times for well done:  
LOW 2 hours per 500g  
HIGH 1 hour per 500g
- Note:** Unlike roasting in your oven, meat cooked to well done in the slow cooker will still be very tender.

### Slow Cooked Roast Chicken

- Wash the chicken in cold running water and pat dry with an absorbent paper towel. Rub with a little olive oil and season all over with salt and pepper (or any other spices you wish). Using a frypan, brown the chicken for a few minutes on each side until golden, then slow cook.
- Note:** Ensure chicken is cooked all the way through by inserting a skewer or knife into the meatiest part of the chicken. The juices will be clear when the chicken is cooked through. If the juices are pink, a little more cooking is required.

### Slow Cooked Stocks

- With your Sunbeam Duos you can easily make stocks. Many slow cooker recipes use stock as part of the ingredients. A good stock is also the base of a great soup. Stocks can be bought at supermarkets; however, nothing beats the flavour of a homemade stock.
- Making your own stock is a great way to use up bones or carcasses that would normally be thrown away.
- There is no need to peel your vegetables when making a stock. Just ensure you wash them well before use.
- Fresh made stock will keep in the refrigerator for up to 4 days, but can be frozen for up to 3 months.
- Always label and date your stock before storing. It's a good idea to freeze stock in portioned sizes. So for example if you generally use stocks in stews, casseroles, curries etc, then freeze your stock in 1 cup portions. If you tend to use your stock more for gravies and sauces, then freeze it in smaller ¼ cup portions or even in ice cube trays, so that you don't need to defrost large quantities at a time.
- To remove the excess fat, place the stock in the fridge overnight, then skim the solidified fat from the surface.

# Troubleshooting

<b>Problem</b>	<b>Possible Reason</b>	<b>Solution</b>
The screen is blank	The unit has no power	Check the cord is inserted into the machine, that the power is switched on at the power outlet, and that the POWER button on the unit has been pressed.
	The unit is in standby mode as START button has not been pressed within 20 minutes of setting the program	Press the POWER button to turn back on and reset your program and press START.
Sous Vide light on the control panel is flashing	Flashing indicates the unit is still gaining temperature	The flashing will stop when the set temperature is reached. By pressing the TEMP button you can see the current temperature which will give you an idea of how much longer before the set temperature is reached.

## Sous Vide Recipes continued

### Chermoula Marinade

This marinade is great for chicken and beef.

- ½ cup olive oil
- 2 tablespoons freshly chopped coriander
- 2 tablespoons freshly chopped flat-leaf parsley
- 2 tablespoons lemon juice
- 1 tablespoon chili flakes
- 1 tablespoon ground cumin
- 1 tablespoon sweet paprika
- 2 bay leaves
- 2 cloves garlic, crushed
- 2 onions, chopped
- ½ preserved lemon, thinly sliced
- 1 cm ginger, peeled, grated
- Salt and freshly ground black pepper, to taste

1. Preheat unit to correct sous vide temperature.
2. Combine all ingredients in a bowl. Season to taste with salt and pepper.
3. Coat desired meat in marinade.
4. Arrange meat in a single layer in the cooking pouch. Vacuum seal.
5. Place pouch in unit once correct temperature has been reached. Cook for required time. (If not consuming immediately submerge the pouch in an ice bath until thoroughly chilled then refrigerate).
6. Remove from bag.

**TIP:** if desired heat a small amount of oil in a fry pan over medium heat. Add meat and cook for 1-2 minutes on each side or until golden brown.

### Portuguese Marinade

This is great for those that like a bit of spicy kick to their food. Great for chicken, beef or lamb.

- 3 slices lemon
- ½ cup olive oil
- 1 tablespoon chili paste
- 1 tablespoon fresh oregano, chopped
- 1 teaspoon powdered garlic
- 1 teaspoon powdered ginger

# Slow Cooker Recipes – Desserts

## Rice Pudding

Serves: 4

325g can sweetened condensed milk

5 cups milk

1 ½ cups arborio rice

1 teaspoon vanilla essence

1. Place condensed milk and milk in the pan. Whisk to combine.
2. Stir through rice and vanilla essence. Place lid on unit.
3. Press MENU and select SLOW COOK. Cook on HIGH for 3-4 hours or LOW for 6-8 hours. Serve hot.

**Tip:** Add a cinnamon stick or a few cloves for a delicious twist.

## Gingerbread and Golden Syrup Pudding

Serves: 8

¾ cup golden syrup

2 cups plain flour

¼ cup brown sugar

1 tablespoon ground ginger

100g butter, diced

¾ cup milk

1 teaspoon baking soda

2 eggs

1. Place an upside saucer in the base of the cooking pan.
2. Lightly grease an 8 cup capacity pudding basin.
3. Pour half of the golden syrup into the pudding basin. Set aside.
4. In a large bowl combine flour, brown sugar and ginger.
5. Rub butter into the flour mixture until mixture resembles breadcrumbs.
6. In a jug combine milk, baking soda and eggs. Add to flour mixture with remaining golden syrup and stir until just combined. Pour into the prepared pudding basin.
7. Cover the top of the basin with a piece of baking paper and then a piece of tinfoil. Place a pleat in the middle of the covers, then secure to the basin with a piece of string.

**TIP:** The pleat in the baking paper and tinfoil allows the pudding to rise.

8. Place pudding basin on top of the upside down saucer in the cooking pan and add enough boiling water so that it rises until halfway up the pudding basin. Place lid on unit.

# 12 Month Warranty

This Sunbeam product is covered by a 12 month replacement or repair warranty, which is in addition to your rights under the Australian Consumer Law (if your product was purchased in Australia) or New Zealand Consumer Guarantees Act (if your product was purchased in New Zealand).

Should you experience any difficulties with your product during the warranty period, please contact our customer service line for advice on 1300 881 861 in Australia, or 0800 786 232 in New Zealand.

Alternatively, you can send a written claim to Sunbeam to:

## Australia

Units 5 & 6, 13 Lord Street  
Botany NSW 2019 Australia

## New Zealand

Level 6, Building 5, Central Park  
660-670 Great South Road  
Greenlane, Auckland New Zealand

Upon receipt of your claim, Sunbeam will seek to resolve your difficulties or, if the product is defective, advise you on how to obtain a replacement or refund.

To assist us in managing warranty claims, we recommend you register your product as soon as practicable after purchase by creating a MySunbeam account on our website and send a copy of your original receipt to Sunbeam.

In order to make a claim under our warranty, you must have the original proof of purchase documentation for the product and present it when requested.

Should your product develop any defect within 12 months of purchase because of faulty materials or workmanship, we will replace or repair it, at our discretion, free of charge. A product presented for repair may be replaced by a refurbished product of the same type rather than being repaired. Refurbished parts may be used to repair the product.

Our replacement or repair warranty only applies where a defect arises as a result of faulty material or workmanship during the warranty period. Your warranty does not cover misuse or negligent handling (including damage caused by failing to use the product in accordance with this instruction booklet), accidental damage, or normal wear and tear.

Your warranty does not:

- cover freight or any other costs incurred in making a claim, consumable items, accessories that by their nature and limited lifespan require periodic renewal (such as filters and seals) or any consequential loss or damage; or
- cover damage caused by:
  - power surges, power dips, voltage supply problems, or use of the product on incorrect voltage;
  - servicing or modification of the product other than by Sunbeam or an authorised Sunbeam service centre;
  - use of the product with other accessories, attachments, product supplies, parts or devices that do not conform to Sunbeam specifications; or
  - exposure of the product to abnormally corrosive conditions; or
- extend beyond 3 months if the product is used in commercial, industrial, educational or rental applications.

**The benefits given to you by our warranty are in addition to other rights and remedies under law in relation to the product.**

**In Australia our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.**

**Our goods also come with guarantees that cannot be excluded under the New Zealand Consumer Guarantees Act.**

If your warranty claim is not accepted, we will inform you and if requested to do so by you, repair the product provided you pay the usual charges for such repair. You will also be responsible for all freight and other costs.

Should your product require repair or service after the warranty period, contact your nearest Sunbeam service centre. For a complete list of Sunbeam's service centres, visit our website or call our customer service line for advice on 1300 881 861 in Australia, or 0800 786 232 in New Zealand.
